

CASE STUDY

CUSTOMER

PT. TJIWI KIMIA: PULP AND PAPER MILL

LOCATION

INDONESIA / JUL 2012

EQUIPMENT

PULP MILL

APPLICATION

PULP SLURRY

PROVEN RESULTS

SLURRY PUMP
PROTECTED
WITHIN FIRST
8 HOURS
OF OPERATION

CHALLENGE

Prevent the slurry pump and its components from premature wear due to excessive bale wire contaminating the pulp slurry.

SOLUTION

Replace traditional magnetic filters with OEI filtration technology.

RESULTS

The photo shows substantial contamination, including bale wire, captured after 8 hours of operation.

After successful implementation, the mill has ordered multiple OEI filters to replace their previous magnetic filtration systems to protect the integrity of their equipment.
