

## CASE STUDY

CUSTOMER

MAINLAND SAND &amp; GRAVEL

LOCATION

ABBOTSFORD, BC CANADA / MAY 2011 - JUL 2013

EQUIPMENT

REFINERY

APPLICATION

NEW OIL

PROVEN  
RESULTSCLEANED NEW  
OIL FROM  
CONTAMINATION

## CHALLENGE

New oil from the refinery is contaminated with particles of ferrous and non ferrous contamination down to submicron in size. Traditional filtration is only capable of removing contamination effectively to 10 microns in size without flow restriction.

## SOLUTION

Install 2 OEI magnetic y-strainers on the system in order to ensure the cleanliness of the oil before use.

## RESULTS

The system has been in place for the past two years and the customer is very pleased by the amount of contamination removed from the new oil.
